Professional Experience

Rubrik • Palo Alto, CA
Member of Technical Staff

May 2019 - Present

- Helped to bring Sonar, Rubrik's data classification SAAS product, to launch through the implementation of essential features throughout the stack. Key contributions include the Content Discovery report and the User Awareness UI.
- Triaged issues raised by customers and the sales team to streamline customer experience.
- Mentored teammates about fundamental UI concepts, enabling the implementations of core UI features in React, TypeScript, and Apollo GraphQL.

LeetCode • Palo Alto, CA
Software Engineer

Nov 2017 - April 2019

- Implemented key features in a comprehensive rewrite from scratch of the most trafficked page, the "question detail" page, on LeetCode.com in React with tens of thousands of daily active users.
- Designed and developed entire frontend of site notification system to poll backend for hundreds of thousands of notifications using Apollo GraphQL, React and local storage API to sync multiple browser instances and reduce redundant requests.
- Drove decisions regarding frontend tech stack (React, Typescript, Apollo GraphQL, LESS, CSS Modules) across team of approx. 10 engineers for all future projects.

Skills: JavaScript (ES6+), TypeScript, Python, HTML/CSS, React, Redux, GraphQL

Education

UC San Diego
B.S. Computer Science, GPA 3.29

Sep 2014 - Dec 2017

Projects

DofusLab • dofuslab.io

An equipment previewer and builder for the MMORPG Dofus; a Flask application serving GraphQL to a Next.js-powered frontend.

HH-signups • harrowhold.herokuapp.com

A node.js web application to organize a weekly 20-player raid in a MMORPG using Discord OAuth and Airtable API.
